## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Harkin et al. (US 5,705,413).

Harkin teaches an inorganic masking pattern **21** may be a metal such as tantalum or tungsten, which reads on a masking material, which comprises a metal (column 7, lines 63-65). Since Harkin's masking pattern is the same masking material as that of the claimed invention, then using Harkin's masking pattern would inherently result in a metal having a specific physical property that its melting or boiling point, when it is converted into a nitride or carbide is higher than that of in the form of single metal.
